

## Lab 1 - Assignment 1

**Due: 11:59 pm, Wednesday, February 3**

[This is a team assignment.](#) The submission should have the answers for Problem 1 below. The submission link is available on the Brightspace.

### 1. Problem 1

In this problem, we want you to [finalize your team members](#) and start to discuss following questions for the final project:

- Q1: Team Name (As cool as possible)  
Team As cool as possible
- Q2: Team Members' Names  
Sophia McGlew, Greg Lamb, Devin Salter
- Q3: What is the problem you plan to solve?  
Artists aren't making enough money through ad revenue on other websites.
- Q4: What is your idea?  
Create a website that shows downscaled versions of artists' works while offering a way to buy the full scale piece.
- Q5: Who are the target users/customers?  
People who are interested in high quality art and photographs.
- Q6: Why is it a good idea?  
Many artists struggle to make ends meet despite creating inspiring works. They should be able to survive off of their contribution to society if many enjoy their work instead of making practically nothing by having another website host their work for pennies.

[Each team can have 3 or 4 members.](#) Along the way to work for Assignment 1, I would also recommend the team to finish following tasks as well:

- Create a shared GIT repository
- Setup a shared working platform (Google doc, Dropbox, etc.)
- Maintain a list of all team members' contact information (Email, phone, messaging, etc.)

## **2. Submission Requirement**

Each team only needs to have one team member to submit the assignment. All team members will share the same grade for Assignment 1. The submission needs to be one document (.DOCX or .PDF format) that answers Q1 - Q6 questions.
